

# Reflecting On My Practice

- 1) What tool did I use? On what date? With what group of students or class?
- 2) Have I used this tool before?
- 3) How did I build the tool into my lesson plans? And for what purpose?
- 4) Did I use the tool as written or modify it in any way? (Explain any modifications.)
- 5) What worked well? What (if any) issues or challenges did I face?
- 6) What might I do differently the next time I use this tool to make it work even better?
- 7) How did the tool affect me, my students, and/or our classroom environment?  
(Did it affect factors like engagement, effort, or collaboration? Did it promote better behavior, thinking, or learning? Did it enhance my teaching, my relationships with students, or the classroom environment?)
- 8) Would I use this tool again and/or recommend it to a colleague? Why or why not?
